

IMI Level 3 Hybrid/Electric Vehicle Training (VRQ)

Part Number: WPTTENEV3

Duration: 1 day

OVERVIEW

TEN Automotive now offers the Level 3 Electric/Hybrid Vehicle Training. This one-day course is a 'bolt-on' to the current Electric/Hybrid Vehicle Level 2 course and is specifically designed for Technicians who maintain and service Electric/Hybrid Vehicles which require the removal/replacement of High Voltage components.

The course will focus on the safe removal and replacement procedures of High Voltage components on Electric/Hybrid Vehicles.

The course includes a classroom presentation and practical demonstrations with the candidates performing 'hands-on' exercises on Electric/Hybrid Vehicles within our workshop. Candidates are assessed on the practical exercises to achieve the EV Level 3 standards.
