

Technical for Non-Technical

Part Number: WPTATTNonTech

Duration: 1 day

SUPPORTING THE DEVELOPMENT OF ANYONE WORKING IN A NON-TECHNICAL ROLE WITHIN THE AUTOMOTIVE INDUSTRY.

- A bespoke designed course to give non-technical workers within the automotive industry an introductory understanding of vehicle systems and maintenance requirements to best support/advise customers
- This course can be adapted to your requirements, to include bespoke workshop sessions and group booking requirements, please call to discuss your requirements

WHAT THE COURSE COVERS

- An introduction to vehicle layouts
- An introduction to vehicle systems (Engines, Transmission, Steering, Suspension and Brakes, Electrics and EV/Hybrid vehicles)
- An overview of maintenance requirements and why we advise serviceable items at given intervals
- A look into common system issues and common causes to include questioning techniques

WHAT ARE THE AIMS OF THE COURSE?

To give a better understanding of vehicle systems, maintenance requirements and common issues that non-technical personnel may need to support customers with.

WHO IS THIS COURSE FOR?

This course is designed to support development of anyone looking to join or already working within a non-technical role within the automotive industry.
