

## Understanding Diagnostics 1 (UD1)

Part Number: DLAUD1

Duration: 1 day

### Course Overview

Diagnostic equipment is vital for diagnosis of all systems on modern vehicles, however, without a robust diagnostic process these tools are ineffective. During this practical course you will learn how to use diagnostic tools, in conjunction with a diagnostic process that can be implemented to any fault on a vehicle including those with secure gateway.

This course will help you fix vehicle faults first time, every time!

### Course Objectives

Upon completion of the course, participants should be able to:

- Implement a robust and reliable diagnostic process
- Have knowledge of the scope of equipment at their disposal to diagnose vehicle faults
- Understand how to utilise the features on modern diagnostic tools
- Be able to diagnose or repair vehicles with secure gateway
- Faults covering SRS, secure gateway, engine management and more
