

IMI Accreditation Light Vehicle Inspection Technician (ATA)

Part Number: WPTGTGAUME14

Duration: 1 day

Course Summary

This assessment is designed for technicians whose job role involves the inspection, maintenance and repair of light vehicles. Candidates will have to successfully complete a range of practical and knowledge based assessments. IMI Accreditation is achieved through full assessment, which involves the completion of all practical and knowledge bases and assessments at each level. The accreditation will certify the technicians ability to use emission-testing equipment for both petrol and diesel vehicles, as well as to accurately analyse the results of these emission tests.

Achievement ensures that candidates meet the requirements to take the MOT tester course. On completion of this assessment, inspection technicians will be able to calibrate emission test equipment before testing a vehicle, accurately inspect a vehicle, diagnose faults and correct repair requirements. As well as having the knowledge of the appropriate wiring diagram required for the electrical systems of the vehicles being tested and the skill to apply it.

Certification

IMI Certification

Prerequisites

Attending technicians must be able to work unsupervised. Ideally, they should be in full time employment with at least 3 years' experience to ensure they are familiar with skills, knowledge and techniques required for vehicle servicing, inspection and system(s) diagnosis.

To enquire about this course, contact the team at sales@workshop-pro.co.uk

Who Should Attend?

Technicians with a minimum of 3 years' experience, who wish to gain a nationally recognised accreditation.

Technicians looking to become an MOT tester with a minimum 4-years experience of working in this field.

Key Benefits

Technicians:

- An IMI accredited certificate
- Inclusion on the IMI professional register
- Industry wide recognition of their skills and abilities
- Advice and guidance for development
- An opportunity for career progression

Employers:

- It will assure you as a garage owner and your customers that your technicians are up to the National Occupational Standards
- Proof of current technical competence and professional responsibility
- A benchmark for technician recruitment and training

Additional Information

**** Please remember to bring boots and overalls with you ****

IMI Application Form can be found [HERE](#)

Please return completed application forms to craftconfirmations@gtg.co.uk at least 1 week prior to attending the course.

We would recommend that prior to attending this training you should consider the IMI Familiarisation Light Vehicle Inspection 2-day training. This will help to familiarise you with the use of measurement equipment, multi meters and wiring diagrams.
