

## IMI Level 4 Award in Diagnostic Testing & Repair of Electric/Hybrid Vehicles & Components (VRQ)

Part Number: WPTATTEV4

Duration: 2 days

### OVERVIEW

This qualification contains the knowledge of the dangers surrounding repairs carried out to live high voltage vehicle electrical components and systems. The purpose and aim of this qualification is to provide technicians working on electric/ hybrid vehicles with the required level of skills and knowledge to carry out repairs on live high voltage vehicle electrical components and systems safely.

This qualification has been developed by IMI in conjunction with electric vehicle manufacturers, the health and safety executive, training providers and the IMI Sector Skills Council. It is the first qualification to address live electric vehicle (high voltage) technology. The qualification is essential to ensure the health and safety of individuals working with live high voltage vehicle electrical components and systems.

### WHO IS THIS COURSE FOR?

This course is suitable for Senior technicians & Master Technicians and Engineers.

### WHAT EXISTING KNOWLEDGE IS NEEDED?

You must have the IMI Level 3 Electric Vehicle qualification and be willing to complete a 1000 word assignment in order to complete this training course.
